Academic Details

- Bachelor of Technology (B.Tech) Computer Engineering**
Mangalayatan University, Aligarh;
(2022-2025) Expected

Technical Skills

- Programming Languages**
Java, C++, OOP, MYSQL , HTML, CSS, Tailwind CSS, JavaScript.
- Frontend Technologies**
React.js, Redux , Material-UI (MUI Theme).
- Backend and API Development**
Node js, Express js ,REST APIs.
- Database**
Mongo DB, Firebase Storage.
- Cloud & Deployment**
GitHub, Vercel, Netlify, Render

Professional Competencies

- Problem-Solving & Debugging
- Leadership & Team Collaboration
- Agile & Scrum Methodologies
- Time Management & Productivity
- Effective Communication
- Critical Thinking & Analytical Skills.

Certificates

- Full Stack Web Development (30_Days_Coding).**
Proficient in full-stack web development, trained in HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, and Firebase.
- Creating Responsive Web Pages Using Bootstrap 4 (Infosys Springboard)**
- React Development Coursera**

Profile Summary

- Proficient in MERN and FERN stacks, with hands-on experience in building robust web applications using MongoDB, Express.js, React.js, and Node.js.
- Beginner-level understanding of Next.js, enhancing web development capabilities.
- Experienced in building and troubleshooting CPUs, complementing software development expertise with practical hardware knowledge.
- Committed to ongoing professional development, evidenced by completion of industry- relevant certification in Full Stack Web Development.
- Completed an internship as a Full Stack Web Developer at Digimation Flight, where I developed and deployed a website using the MERN stack, hosted it on Hostinger, and configured the backend server on AWS EC2.

Projects

JobHunter-FullStackJob Portal (Web App) Feb-2025/March-2025 Tools: MERN Stack, Redux, Tailwind CSS,Cloudinary

Responsibilities:

- Developed** a full-stack Job Portal with **React**, ensuring a responsive and user-friendly interface for seamless navigation across devices.
- Built** a robust backend using **Node.js** and **Express**, managing secure authentication, course enrollments, and server-side processing.
- Integrated MongoDB** for efficient data management and **Firebase Storage** for handling multimedia content.
- Created** an admin panel to manage Job Application and Job Profile users, and view real-time data visualizations with **Recharts**

E-Commerce- OnlineStore (Web App) Sep-2024/Dec-2024 Tools: MERN Stack, Redux, Tailwind CSS,Material UI

Responsibilities:

- Designed and implemented the responsive layout of the E-Commerce website using React, ensuring a seamless user Experience across various devices
- Developed the backend of the web application, which handled authentication, request processing, and other server-side logic.
- Integrated Redux for efficient state management and Material-UI for an intuitive UI/UX.

City Connect Rider App (Web App) May-2025/Present Tools: MERN Stack, Redux, Tailwind CSS,Material UI, Google Map Api

Responsibilities:

- Implemented user authentication with role-based access for riders and admins
- Integrated Google Maps for real-time vehicle location tracking and dynamic route display
- Developed a booking system allowing users to schedule and manage rides.
- Created an admin dashboard to track rider locations and manage vehicle listings (cars & bikes)
- Enabled real-time updates using WebSockets (Socket.IO) for ride tracking.

Experience

Full Stack Web Developer Internship – Digimation Flight January, 2025 – Present

Designed, developed, and deployed a fully functional website for Code Flight using the MERN stack. Implemented front-end and back-end features, ensuring a seamless user experience. Successfully hosted the website on Hostinger and configured the backend server with MongoDB as part of my internship as a Full Stack Web Developer.
